

HOME DECORS ONLINE.

Date: 04-02-2019

Guide: Grace Joseph.

1. Project Overview?

Decorkart-home decors online is the concept of selling home decor items online in an affordable price. A complete shopping site for decorating your dream home interiors. This website allows the customers to purchase items like wall papers, paintings, artificial flowers, plants and so on. Cash on delivery and online payment facilities are provided and the information of all products are updated and maintained.

2. To what extend the system is proposed for?

Shopping Cart System is the Simple shopping Solution. It's a full-featured website and shopping cart system that bends over backwards to give you the flexibility you need to run your online store.

The basic concept of the application is to allow the customer to shop virtually using the Internet and allow customers to buy the items and articles of their desire from the store.

3. Specify the Viewers/Public which is to be involved in the System?

4. List the Modules included in your System?

1.Admin:

The owner of the website who has all the permissions such as add edit and delete products. Customers and the product designer are verified by the owner.

2.Customer:

Only after registered to the website customers can purchase items of their need.If they want a customized product like painting of a photo that they provide,a particular designed wall paper etc. it can also be done.For that the customer can request to the designer along with their specifications.

3.Product Designer:

Product designers are those who are inventing new ideas.When they want to add a new item,it is first send to admin for verification.Only after the approval of the admin the new item is made available to the customers by the admin.

5. Identify the users in your project?

Admin, Designer, Customer

6. Who owns the system?

Admin

7. System is related to which firm/industry/organization?

Industry

8. Details of person that you have contacted for data collection?

De Casa Homez

Erattupetta

9. Questionnaire to collect details about the project? (min 10 questions, include descriptive answers, attach additional docs (e.g. Bill receipts, certificate models), if any?)

1. What are the problems with the current process?

Manual system was very complex to be managed and searching or updating the information was also very difficult. There was a lengthy procedure for entering the details of product, members, Visitors.

2. Typical process to place an order by a customer?

In our existing system everything is done manually. So customer is themselves handpicking the item and is placed for billing.

3. Advantages and disadvantages of existing system?

- Since there is manual work done more employment opportunities are available.
- Increased paper work.
- More human effort is needed.
- Major operations are done manually by taking hours.

4. Is there any authentication mechanism for customers in the existing system?

No. There is no authentication mechanism. Customers directly visit the shop and purchase is done. No details about the customer are stored.
